This says that there are, "Many bright Watercolour puzzle images.", but there is only one image and no way to change it. Watching the video for this game made my child say, "I want to do that one" pointing at one of the many images shown in the trailer, but none of these are available.. Only one puzzle. False advertisement. There is only one puzzle. I was looking for a game to play with my daughter, this worked perfectly.

To the people complaining about there only being one puzzle in the pack:

When you first open the program - it does not give you a choice as to which puzzle you will be doing. But when you go to open it up after the initial launch, it will give you a radio button choice of which puzzle you will be doing. After you finish a puzzle you have to close the program out and open it up with a new puzzle.

To the guy talking about bitcoin farming... I think you maybe downloaded something else with some hidden additions, because I am not seeing it on this program.. Not only did this game freak me out as I was playing this at 3:28am but this game was bitcoin farming too lmao. I checked task manager and this game somehow has 2 processes 1 called setup.exe and the other for the actual game. It uses 20% of my CPU load which with an i7 is pretty high for a game like this. Smartly it only bitcoin mines when you are in the window otherwise you tab out and it jumps back down to 0% usage.

I would recommend to stupid children who want to be bitcoin mined with I don't know a really old processor.. There was only one puzzle and it was a little creepy for a child.
